ABOUT ME

Full Stack Developer and Computer Science student experienced in building and shipping production-grade web applications end to end. Skilled in React (React.js) for frontend development and Node.js (Node) with Express.js for backend / API development, using MongoDB and MySQL for data persistence. Experienced with REST API design, JWT authentication, CRUD operations, and ACID transactions. Comfortable working in Agile/Scrum workflows with Git/GitHub version control, writing automated tests, and setting up CI/CD pipelines. Strong problem-solver with 500+ algorithmic problems solved on LeetCode, and effective at collaborating in teams to deliver clean, maintainable software.

TECHNICAL SKILLS

Languages:	Java, JavaScript, Python, SQL, HTML5, CSS3
Frameworks & Libraries:	React.js (React), Express.js, Node.js (Node), Bootstrap, Tailwind CSS
Databases:	MongoDB, MySQL
Tools & Platforms:	Git, GitHub, VS Code, Vitest, GitHub Actions (CI/CD), Azure, JWT
Core Concepts:	Full Stack Development, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, REST APIs, ACID Transactions, Agile Development, Scrum, Version Control, CRUD Operations, JWT Authentication, Web Development, LLM Integration
Soft Skills:	Collaboration, Communication, Teamwork, Problem-Solving

PROJECTS

AI-Powered Habit Tracker (Momentum)

Full Stack Developer | React.js, Node.js, Express.js, MongoDB, Google Gemini API

- Built a full-stack MERN (MongoDB, Express, React, Node) web application with five Google Gemini AI features — morning motivation, habit-suggestion wizard, streak-recovery coach, weekly report, and a data chatbot grounded in the user's own habit data.
- Made the AI layer fault-tolerant with retries, exponential backoff, multi-model fallback, and response caching to handle Gemini 503, 429, and timeout errors.
- Secured the REST API with JWT access tokens and rotating httpOnly refresh tokens (reuse detection), bcrypt, Helmet, CSRF checks, rate limiting, and NoSQL-injection protection.
- Wrote 200+ automated tests (Vitest, Supertest, React Testing Library; ~95% backend coverage) and set up a GitHub Actions CI/CD pipeline on Node 20 and 22.

Relay Chat — Real-Time Messaging App

Full-Stack Developer | MERN Stack (MongoDB, Express, React, Node.js), Socket.io, JWT, Cloudinary

- Architected a full-stack real-time messaging application using the MERN stack (MongoDB, Express.js, React, Node.js), implementing JWT-based authentication and Socket.io for low-latency, bidirectional communication.
- Engineered group chat functionality with admin-controlled membership and Socket.io room-based message routing, ensuring messages were delivered only to authorized, relevant users.
- Developed emoji reactions, reply/quote messaging, and in-browser voice message recording and playback, extending the core Socket.io event architecture for richer real-time interactions.
- Built a live presence system tracking real-time online/offline status and last-seen timestamps across concurrent WebSocket connections.
- Integrated third-party services — Cloudinary for media storage, Resend for transactional email, and Arcjet for API rate-limiting and abuse protection — and deployed the application as a single production-ready service.

EDUCATION

G.L. Bajaj Institute of Technology & Management, Greater Noida, UP **2023 — 2027**
Bachelor of Technology (B.Tech) in Computer Science & Engineering

Kamla Rai College, Gopalganj
Senior Secondary (12th)

D.A.V Public School, Thawe, Gopalganj
Higher Secondary (10th)

CERTIFICATIONS

- Databases & SQL for Data Science with Python — IBM (Coursera) | Aug 2025
- SQL for Data Science Specialization — University of California, Davis (Coursera) | Aug 2025
- Design Prompts for Everyday Work Tasks — Google (Coursera) | Sep 2025

ACHIEVEMENTS & EXTRAS

- **DSA:** Solved 500+ algorithmic problems on LeetCode (Ultron17) covering arrays, trees, graphs, and dynamic programming.
- **Academic Excellence:** Scored 94.65 percentile in JEE Mains 2023, placing in the top tier nationally.
